

Current Feature List: Contact Data Standardization Application (v1.0)

This document outlines the key features and capabilities available across the three primary views of the application.

1. Data Standardization Interface (cleanup.html)

This component is dedicated to the core task of **cleaning and mapping** messy company names from your source contact data to a single, standardized profile.

Category	Feature	Description
Data Processing	Raw Name Isolation	Automatically retrieves and displays only unique, unmapped raw company names for processing.
	Sequential Mapping	Allows for step-by-step processing of each raw name until all names are standardized.
Mapping Actions	Map to Existing	Link a raw name to an existing Clean Company Profile (e.g., mapping "Alphabet" to "Google").
	Create & Map New	Create a new, unique Clean Company Profile and assign the raw name to it.
	Self-Map/Skip	Quickly convert a clean raw name into its own distinct Clean Company Profile .
Batch Utility	Batch Mapping	Single button utility to automatically convert all remaining unmapped names into new Clean

		Company Profiles and mark them as Target Interest: Yes .
--	--	--

2. Research Hub & Company Management (management.html)

This tool provides a centralized hub for **enriching company profiles** with internal intelligence and leveraging existing contacts for job search and networking.

Category	Feature	Description
Profile Management	Target Interest Flag	Toggle a profile between Target: Yes (high-priority) and Target: No for easy filtering.
	Data Enrichment	Edit and save structured data fields: Size (Employees), Annual Revenue, and Headquarters .
	Free-Form Notes	Dedicated space to capture unstructured research, hiring signals, and team notes.
Networking Intelligence	Linked Raw Names	View a list of all raw name variations that have been mapped to the current company profile.
	Contact Linking	Displays a list of all contacts from your source data who work for the selected company.
	Direct LinkedIn Access	Each linked contact includes a clickable LinkedIn URL for

		immediate professional research and outreach.
--	--	---

3. Overview and Filtering Dashboard (index.html)

The landing page provides a high-level, filterable summary of all standardized data, acting as the main dashboard for tracking targets.

Category	Feature	Description
Navigation	Seamless Navigation	Quick access links in the header to jump to the Cleanup and Management pages.
Filtering	Target Filter	Filter the entire company list instantly to show only companies marked as Target Interest: Yes.
	Name Search	Live search functionality to filter the table by the Clean Company Name.
Reporting	Profile Data Table	Displays a clear, read-only table summary of all key profile data (Clean Name, Target Status, Revenue, etc.).

This list covers all the major user-facing functionality currently implemented. Let me know if you'd like to dive into the technical details and create the **API Reference** next!
